Numb. 1383

THURSDAY, FEBRUARY 17. 1743.

Naples, Jan. 29.

ON the 23d of this Month his Majesty took the Diversion of Hunting in the adjacent Forest. Eleven Tartanes arriv'd within these few Days in our Port, with the Artillery on board, which was originally intended for the Spanish Army. His Majesty has been graciously pleased to signify to the [illegible] of this City, that he was firmly resolv'd to [illegible] the late Treaty of Neutrality exactly; which [illegible]ration'd mighty Rejoicings, there being nothing [illegible]ch the People are so much averse as a War with [illegible].

[illegible], *Jan.* 22. The Register Ship call'd the St. Ra[illegible] also the Concord, are sail'd from hence; the [illegible] Carthagena, and the other for La Vera Cruix. [illegible]ador is also ready to sail for Buenos Ayres, the [illegible]ce of which Colony is shortly expected home on [illegible] Man of War. The French Register Ship call'd [illegible]ale, lately arriv'd at the Groyne, has occasion'd [illegible] deal of Noise; five Persons belonging to her [illegible]rrested, and put in Irons, on certain Information [illegible] our Court; since which it appears by unde[illegible]Evidence, that they shipp'd in America large Quan[illegible] of Goods, not mentioned in their Schedula, and [illegible]they did not bring with them into Europe, but [illegible]them either at Louisburg, or Cape Breton. The [illegible]upon this has taken a Resolution never to employ [illegible] Vessels any more.

[illegible], *Feb.* 9. M. Vincent, who is charg'd with [illegible]irs of France, is preparing to set out on his Re[illegible]ome; and M. Gundel, her Majesty's Minister at [illegible] is shortly expected here. Orders have been lately [illegible]ued to Bohemia, to prohibit all Commerce with [illegible], and to forbid the Nobility to suffer any of their [illegible]n to travel thro' that Country. Her Majesty has [illegible]ed a Council of Six at Prague, who are to try [illegible]ngelses of that Place, and such other Persons as [illegible] greatest in Confinement on account of treasonable [illegible]s. We are amassing great Quantities of Provi[illegible] which are to be sent to the Upper Palatinate for [illegible] of our Army. The new Levies go on surpri[illegible], and we expect, by the beginning of March, to [illegible] the Number of Recruits which this Kingdom [illegible]ength.

[illegible], *Feb.* 18. The King confers assiduously with [illegible]sters. They are surprized to see with what Dex[illegible] he decides on the most complicated Affairs. His [illegible] absolutely refused to accept the Resignations of [illegible]ces he had given to the Nephews of Cardinal [illegible], and they will be obliged to keep 12,000 Livres [illegible]each, whether they will or not. The Comptroller[illegible] has been by Order of his Majesty to the Church [illegible] Louis de Louvre, to take a View of the Place [illegible] the Tomb of Cardinal Fleury is to be erected. [illegible] Church has 2 Chapels in it, one on the Right Hand [illegible] other on the Left. In the latter the Tomb is to [illegible], but as it is not above seven Foot Square, it will [illegible] fill it up, and Divine Service will, for the future, [illegible]ebrated in the Right Hand Chapel only. This [illegible] is 108 Foot long, and 42 broad. As to the [illegible] the Cardinal's Tomb, eight of the most cele[illegible]Architects of the Kingdom are to present Models [illegible] which are then to be exposed in the Hall of the [illegible]my for Sculpture, in order to have the Judgment [illegible] Members of that Society, and of the Publick; [illegible] Spectator will be at Liberty to offer his Senti[illegible] or even to give them in Writing, if he thinks [illegible]. le Moine, who made the Equestrian Statue of [illegible], lately sent to the City of Bourdeaux, will be [illegible] these eight Architects; and that he may succeed [illegible], he has had Leave to take a Print of the de[illegible]Cardinal's Face, and the Dimensions of his Limbs. [illegible] Don Philip is very much indisposed at Cham[illegible]Part of his Cavalry are returned into Dauphiny for [illegible] of Forage, and a great Part of his Infantry must [illegible] the same to avoid Starving. A great Mortality [illegible] in that Army, occasioned by their wintering in a [illegible] which so much differs from their own. Since [illegible]th of Cardinal Fleury the Prince de Campo Flo[illegible] has presented two Memorials, setting forth the [illegible]y of supporting the Infant in his Design; and [illegible] great Probability that he will at last carry his [illegible] and induce his most Christian Majesty to send a [illegible] Body of his own Troops into Savoy.

COUNTRY NEWS.

[illegible]castle, *Feb.* 12. Yesterday died John Lowther, M.D. [illegible]Searcher of his Majesty's Customs for this Port.

On Monday last four Companies of Brigadier-General Howard's Regiment of Foot arrived in Town from Berwick, and the Regiment is now Quarter'd in and about this Town. The Ships which are to take them in are not yet arriv'd, but its thought they will embark immediately on their Arrival.

At Holyhead, the George, Bevan, from Jamaica, in 15 Weeks.

LONDON.

The Marquis de Prie, Ambassador from the Queen of Hungary to the Cantons of Switzerland, has presented a Memorial to the Helvetic Body, in which he suggests, that their granting Troops to the King of Spain is a direct Violation of their Neutrality; and his Excellency absolutely insists on their refusing a Passage to the Spaniards thro' their Territories.

Private Letters from several Parts of France agree, that Seamen are hastning from all Parts to Toulon, and that it is certain that the French Squadron equipping in that Port, will very quickly put to Sea.

There died lately at Sechausen, in the old March of Brandenbourg, one Charles Magnus, who was 113 Years, 11 Months, and 15 Days old. He was born in Sweden on the 17th of February, 1629, and after serving some time in the Troops of his own Country, he enter'd into the Pay of the Elector of Brandenbourg, and continued in that Service till the Year 1693; since which Time, he has lived in a little Farm.

The first Column of French Recruits which are to march into Germany, actually mutiny'd, threw down their Arms, and declared that they were ready to sacrifice their Lives immediately in the Service of the King, provided they might be excused going into Bavaria; but by fair Words, and large Promises, they were at last engag'd to proceed.

Some Letters from Paris say, that his most Christian Majesty has order'd it to be intimated to a certain Foreign Minister, that if the Troops now march'd into Germany shall act against France, he must be oblig'd to send 30,000 Men immediately into Savoy, in order to force a Passage into Italy, in conjunction with the Spaniards.

Some Letters from Mentz say, that two Ministers from the Court of Vienna were lately arriv'd there, and that Mr. Villers was hourly expected; from whence it was conjectur'd, that a Congress would shortly be open'd there, for terminating the Differences between her Hungarian and his Imperial Majesty.

Yesterday the Commissioners of his Majesty's Navy contracted for Malt.

On Tuesday died, at his Mother's House near Red-lion Square, Master Barnardiston, only Son of the late Samuel Barnardiston, Esq; a great Turky Merchant; by his Death an Estate of 5000 *l.* per Ann. in the County of Suffolk, falls to the Lady of Sir John Shaw, Kt. decas'd, of Eltham in Kent.

The same Day died in Child-bed the Lady of Colonel Fielding, Brother to the Right Hon. the Earl of Denbigh, at his House in New Bond-street.

Yesterday was held a Court of Directors of the India Company, when Capt. Adair, Commander of the Winchelsea, bound for Coast and Bay, took his Leave of the said Court; as did Messieurs Page, Martin, Hodgson, Searl, and Burrows, the Company's Supercargos on board the Heasilingfield, Capt. Haldane, bound for China.

To-morrow a Court of Common-Council is summon'd to meet at Guildhall, on extraordinary Affairs, and for the Choice of the several Committees of this City.

On Tuesday last the Right Rev. the Lord Bishop of Lincoln appointed Anthony Reynolds, Esq; principal Register of the Diocese of Lincoln, and also Register under his Commissaries of the Archdeaconries of Lincoln and Stow.

The Place of Custos Brevium in the Court of Common Pleas, in the room of the late Earl of Litchfield, deceas'd, is in the Gift of his Majesty; it is a Place of considerable Profit.

Yesterday Jonn Herryman, Esq; a Gentleman possess'd of 1000 *l.* per Ann. in the County of Hertford, was married to Miss Norris, a beautiful young Lady, with a good Fortune.

We hear, that the Number of Tickets for the intended Lottery will be 80,000, at 10 *l.* a Ticket, and seven Blanks to a Prize. The highest Prizes will be, as we are inform'd, two Ten thousand Pounds, and the lowest Twenty Pound.

RANELAGH HOUSE.

This is to give Notice, That on Monday next, being the 21st Day of February, 1742. the Breakfasting will be opened as usual. No Person will be admitted under One Shilling at the Gate, and One Shilling for Breakfast. There will be French Horns during the Breakfasting.

N. B. *Whereas last Year the Subscribers Tickets were indulged to come in in the Morning, tho' contrary to the Printed Proposals, and several Inconveniencies having arose from their being lets to improper Persons, it is humbly hoped, that no Subscriber will take it ill, that his Silver Ticket cannot be admitted to the Breakfasting; the original Agreement being only to admit them to the Evening's Entertainment.*

THE Elements of ALGEBRA, in a

New and Eaſy Method; with their Uſe and Application, in the Solution of a great Variety of Arithmetical and Geometrical Queſtions, by General and Univerſal Rules.

To which is prefix'd, An Introduction containing a ſuccinct Hiſtory of this Science.

By Mr. NATHANIEL HAMMOND, *of the* Bank.

Extract from the Account of this Book in the Works of the Learned.

'The World has long complained of the Want of a proper 'Introduction to Algebra. Some are ſo very conciſe, as if 'they were contrived not to teach but introduce a Teacher; 'others again are larger, but wrote with ſo little Condeſcention to the Underſtandings of ſuch as are altogether unacquainted with the Science, that they are of very little Uſe 'to thoſe who are moſt inclined to make uſe of them. Whence 'it comes to paſs, that few find it practicable to make any 'Progreſs in Algebra without a Maſter, tho' certainly the Science in itſelf is far from ſurpaſſing a clear Head, and a tolerable Underſtanding.

'The Deſign of this Treatiſe, which is of a reaſonable Bulk, 'and which contains nothing which is not ſolid, and to the 'Purpoſe, is to aſſiſt ſuch as are engaged in teaching Algebra 'with a regular Method, and a large Stock of Examples; ſo 'that their Scholars may find Employment in their Abſence; 'and to enable ſuch as live in Country-Places, and muſt conſequently want all other Tutors, except Books, to acquire 'ſuch a Skill in this Science, as may enable them to ſpend a 'Portion of their Time agreeably in the Cultivation of their 'better Parts, and in rendering a natural Method of enquiring after Truth habitual.

'The Treatiſe begins with a copious Explication of the 'Fundamental Principles of the Art, and of the Signs and 'Method of Notation uſed therein. The Author then proceeds to the ſeveral Rules, explaining them carefully and copiouſly in all their various Caſes; ſo that with a moderate 'Attention it is ſimply impoſſible for a Perſon, who deſires to 'be Maſter of Algebra, to miſs of his End.

'We never find this Writer advancing any thing out of its 'proper Place, or burthening the Mind of his Scholar with 'Rules, before they become neceſſary: He profeſſes to have 'imitated the judicious *Euclid* in this Reſpect; and he has 'done it with equal Art and Felicity. By this means he has 'delivered the young Student in Algebra from that which is 'uſually the moſt fatiguing Part of the Science, viz. The 'Doctrine of Surds, in the Manner in which it is uſually 'taught. By the ſame Means he leads his Reader directly to 'Equations; and, by ſhewing him the Profit he will reap 'from this Science, encourages him to overcome all its Difficulties. But having thus laid a ſtrong and rational Foundation, he moves more ſlowly through the reſt of his Work, 'that whoever follows him, may be obliged to become Maſter 'of ever Branch of the Art, ſo as to be a compleat Algebraiſt, 'before he quits his Book, and not a Smatterer.

'Quadratic Equations, and the Art of managing Converging Series, the admirable Invention of the incomparable 'Newton, are here ſo clearly explained, and their ſeveral Caſes ſo plainly ſet down, and ſo thoroughly explicated, that it 'may be truly ſaid, there are no where elſe ſuch Inſtructions 'to be met with. At the Cloſe of the Book, we find abundance of Obſervations, neceſſary for enlightening ſuch Minds 'as are willing to proceed ſtill farther in analytic Diſcoveries; 'ſo that conſidering the Compaſs of this Work, and that too 'is very moderate, it is as complete as poſſibly can be expected: And he who is thoroughly verſed in it, will find no great 'Difficulties, when he proceeds to ſublimer Studies. The 'Language is plain and natural, the Book is more copious 'than any other in Examples, and the Illuſtrations of them 'are ſo full and clear, that it is impoſſible to miſtake their 'Meaning.'
